

# ARTISAN

- **Description:** For years we have experimented with leathers and finishes that simulate the look of a true antique and after diligent testing we are proud to deliver the Artisan Collection. To make this correctly you need to start with the finest of raw materials. Each hide is completely dyed one at a time each by trained hands to ensure uniform and organic color depth and transparency. The leather is then cut and sewn with the end result in mind of achieving a timeless look. Once upholstered the detailing moves beyond craftsmanship and into the world of artistry. Our technicians labor over each piece adding and removing color simulating the richness of patina that would typically require a generation of use to acquire. This is one of the few areas in our California factory where you will see personnel just taking a step back, like a sculptor or a painter evaluating their composition unfolding on a canvas. With trained hands our Artisans finish each piece of furniture with meticulous care to achieve the old world antiques appearance. Uniquely original, no two items are the same.

<b>Specifications:</b>	Raw Material:	U.S. Bovine
	Hide Size:	55 square feet (average)
	Thickness:	1.2-1.4mm
	Classification:	Full Grain
	Type Dyeing:	Aniline
	Type Finish:	“A” Hand Antiqued

- Customer Care...Keep furniture dust and dirt free. Dusting and vacuuming with a soft brush. Deal with spills and soil gently and quickly (do not rub or scrub). Use a clean cloth or sponge. If necessary, use clean distilled water only and let dry naturally.
- Do not use solvent or any product involving solvents to clean leather furniture
- Natural wrinkles, skin folds, tick bites, cleanly healed scars and other natural range markings are authentic characteristics found only in the very best leather. Like any natural product, grain pattern and color may vary from hide to hide and within each individual hide
- Expect some color variations from hide to hide due to the aniline state of the product. Some color fading may occur if the leather is exposed to direct, intense light and heat.
- Hair oil, hair gels, body oil, body lotions, and some medications can have a chemical reaction to leather that can cause staining, fading, discolorations, and color changes.
- Regular care and maintenance is required to ensure performance and longevity of leather. For our leather furniture, use only our leather cleaning products available from your dealer.
- Warranty for Residential Use Only

## **Type: “A”**

A = Aniline, N = Nubuck, O = Oil/Wax, P = Protected
